**Printing has changed and so have the materials.
Go beyond paper and explore the capabilities of your
HP® Indigo Digital Press with films and custom substrates.**

With over 100 pre-engineered solutions, Dura-Go®, from Tekra®, is the premier substrate for HP Indigo Digital Presses in both industrial and commercial press environments. Dura-Go represents the finest, most proven, most complete plastic substrate line. Our customers know that our proprietary coating technologies make the difference by providing exceptional print receptiveness, ink anchorage and shelf life.

For nearly 15 years, through an ongoing partnership with HP Indigo, we've engineered the highest quality and most consistent coated products in the market. This is all coupled with our advanced coating capabilities and supported by our experienced chemists and engineers. We're here to help develop solutions for your next big...

HP INDIGO PREFERRED PARTNER

Tekra, LLC

Specialize

Tekra's sheet coater line provides it all; exceptional print receptiveness, ink anchorage, shelf life. The real key to this machine is control. It gives you the choice from literally thousands of made-to-order sheets, specifically for your next application. Dura-Go coated sheets are available in smaller quantities, custom thickness or sizes, various colors, and with specialty adhesives from 3M™. If this is the solution your business demands, the options are endless.

Customize

Our stocked product line is extensive, but sometimes you need something special and unique. Our products can be tailored for a specific need, which we pride ourselves on. Our in-house lab will explore and develop a coating formulation just right for your application. Lead times are shorter than ever, so if there's a product not stocked or you want an entirely new product, we can deliver it, quickly.

Certified

Through worldwide distribution and multiple testing procedures in the United States and Israel, Dura-Go products are certified for HP Indigo presses. Approved for both industrial and commercial presses, these products can be found in the HP Media Solutions Locator at www.hp.com. Here you will find the right media solutions to fit your businesses' printing needs.

Certification testing also takes place at the Rochester Institute of Technology (RIT). Tekra works closely with RIT to qualify products for specific presses. Many of these films have received a rating of three stars, the highest rating given by RIT. Testing and product certification updates can be found at www.rit.edu.

Given the broad range of products and the many press models available, not all products are designed to work on all presses. Contact Tekra for technical assistance, samples, and details of our satisfaction guarantee.
